## AND GENERAL INSTRUCTIOMS

Fasten 4 legs to cabinet with bolts and washers furnished. Place back-cabinet in position on front-cabinet. Unlock and open back-door and fasten back-cabinet to front-cabinet with bolts and washers furnished. (2 back-door locks are keyed alike.) Connect back-cabinet and frontcabinet electrically by tightly plugging maleplugs from front-cabinet and panel into corresponding female-plugs in back-cabinet.

Plug power-line into $110-115$ volt 60 -cycle Alternating Current only. Turn on power by turning toggle-switch on lower left side of back-box.

## Place 8 balls in game.

BE SURE TO LEVEL GAME, as instructed in drawing below.

## TO REMOVE TOP PANEL

Unlock front door, remove screws holding front glass-rail, remove rail and glass, remove screws holding sides of panel.

## ACCESS TO BACK-CABINET MECHANISM AND BACKGLASS LAMPS

Backglass may be removed from either side by unlocking side of back-cabinet and removing upright moulding. (Remove moulding by pulling lower part of moulding.)

After removing backglass, access to mechanism is by raising 2 slide-brackets on insert, located on left and right edges of insert, which may then be tilted forward for easy access.

## TURN KNOBS <br> BEFORE SHOOTING 4TH BALL***

Depending on panel lit, after third ball is shot, player may turn knobs on front-moulding to move (a) first 3 vertical lines of Card, (b) first 4 vertical lines or (c) all 5 vertical lines up and down, as illustrated on page 139 and explained in instruction-panel on backglass:

## WHEN MAGIC-LINES PANEL IS LIT MOVE LINES INDICATED UP OR DOWN BY TURNING KNOBS

[^0]
## HOW MAGIC-LINES WORK

Top picture shows Card with all numbers in normal position. Player has already lit 1,16 and 22 by shooting first 3 balls into corresponding holes, but numbers are not lined up in a scoring line up. With Magic-Lines lit, player can turn his lop-sided line-up into a scoring line-up in 3 different ways.

Middle Card shows first possible method of straightening out 3 lit numbers to score 3 -in-line. First line of Card is moved DOWN. Each number in first line moves down one circle, bottom number (11) jumping to top circle. Lights transfer with movement of numbers, lining up 1-22-16 as a DIAGONAL 3-IN-LINE.

Bottom Card shows another method of lining up the 3 lit numbers. First and second lines are moved UP. Each number moves up one circle, top numbers in each line ( 9 and 4) dropping to bottom circles. Lit numbers 1,22 and 16 are then lined up as HORIZONTAL 3-IN-LINE.

When FIRST 4 LINES or ALL 5 LINES is lit, first 4 lines or all 5 lines may be moved up and down to line up lit numbers.

EXTRA TIME: After panel with words "TURN KNOB BEFORE SHOOTING 4TH BALL", player may deposit additional coins* to light panel with words "TURN KNOBS BEFORE SHOOTING 5TH BALL" and other scoring advantages.

When lighted, panel with words "TURN KNOB BEFORE SHOOTING 5TH BALL" remains lit during entire game, and player may deposit additional coins* to light other scoring-advantages.

[^1]

SPOT-FEATURE: 2 Stars on backglass and playfield flash for each coin* deposited and, at mysteryintervals, light and remain lit during entire game.

Player who hits Rollover, when corresponding Star is lit, lights (Red Rollover) 10 or (Yellow Rollover) 25 on Card.

In addition to spotting by hitting lit roll-overs numbers 10 or 25 are directly spotted on Card at mystery-intervals when coin* is deposited.

After lighting Stars or spot-numbers, player may deposit additional coins* to light other scoringadvantages.

SUPER-CARDS: Arrow-lights pointing to SUPER-CARD above each Super-Card flash for each coin* deposited and advance at mystery-intervals. When light advances to fourth arrow, SUPER-CARD lights, qualifying player for in-line scores and corners-scores on Super-Card with corresponding SUPER-CARD lit.

After lighting left SUPER-CARD, player may deposit additional coins* to light right SUPERCARD and other scoring-advantages.

CORNERS-PANEL: Panel with words "CENTER CARD CORNERS SCORE 200" flashes for each coin* deposited and, at mystery intervals, lights and remains lit during entire game, qualifying players for corners-score on Card.

After lighting CORNERS-panel, player may deposit additional coins* to light other scoring advantages.

ADVANCING SCORES ${ }^{* * * *: ~ S c o r e s * * * ~ a p p e a r ~ a t ~ t o p ~ o f ~ b a c k g l a s s, ~ a d v a n c i n g ~ a t ~ m y s t e r y ~ i n t e r v a l s . ~}$
GUARANTEED SCORES***: Scores*** either advance to a higher bracket or remain as high as on previous coin*, never drop back to a lower bracket, regardless of number of coins* deposited.

After advancing scores to highest bracket, player may deposit additional coins* to light additional scoring-advantages.

FXTRA-BALLS FEATURE: After shooting 5 balls, player may press Extra-Balls Button and deposit additional coins* to play for extra balls.

At mystery-intervals, after Extra-Balls Button is pressed, (1st) lights on backglass, when coin* is deposited. After (1st) is lit, light advances, at mystery-intervals, to (EXTRA), when Extra-Balls Button is pressed and coin* is deposited. After (1st) (EXTRA) is lit, light advances, at mystery-intervals, to (BALL), when Extra-Balls Button is pressed and coin* is deposited.

When (1st) (EXTRA) (BALL) is completely lit, first extra ball is released to player.
*When replays are registered, Buttons are pressed, instead of coins being deposited.

Only 1 4-in-line score registers per game. Only highest in-line score registers. Only first corners score registers.

After shooting first extra ball, player may continue to press Extra-Balls Button and deposit additional coins* to light (2nd) (EXTRA) (BALL) in order to receive second extra ball and to light (3rd) (EXTRA) (BALL) in order to receive third extra ball.

Coins* deposited to play for extra balls do not light other scoring-advantages.
After playing for extra balls, player may not play to light other scoring-advantages.
*When replays are registered, Buttons are pressed, instead of coins being deposited.
